# Be A Dental Detective

## DR. SHERLOCK

### What is Dr. Sherlock?

Dr. Sherlock is a diagnostic abilities challenge structured on a problem-solving pattern.

The participants shall use logic, reasoning and deduction in solving a clinical problem. It focuses on structured decision-making rather than an arbitrary approach.

### So, How exactly do I Play Detective?

Round 1: Is a WORDLE game wherein the participants will identify a hidden disease/condition in 5 Tries in 3 minutes.

Round 2: The chief complaint, along with the clinical picture, will be provided. The participants will then seek relevant history and investigations. They need to provide an explanation for seeking the details.

Necessary details to be provided may include important disease events and imaging details. Any chair side investigation can also be sought.

### OK, Who can participate?

3 members are allowed in each group.

After an elimination round, six teams will be eligible for the final round.

The preliminary round will be in the form of a timed Google form.

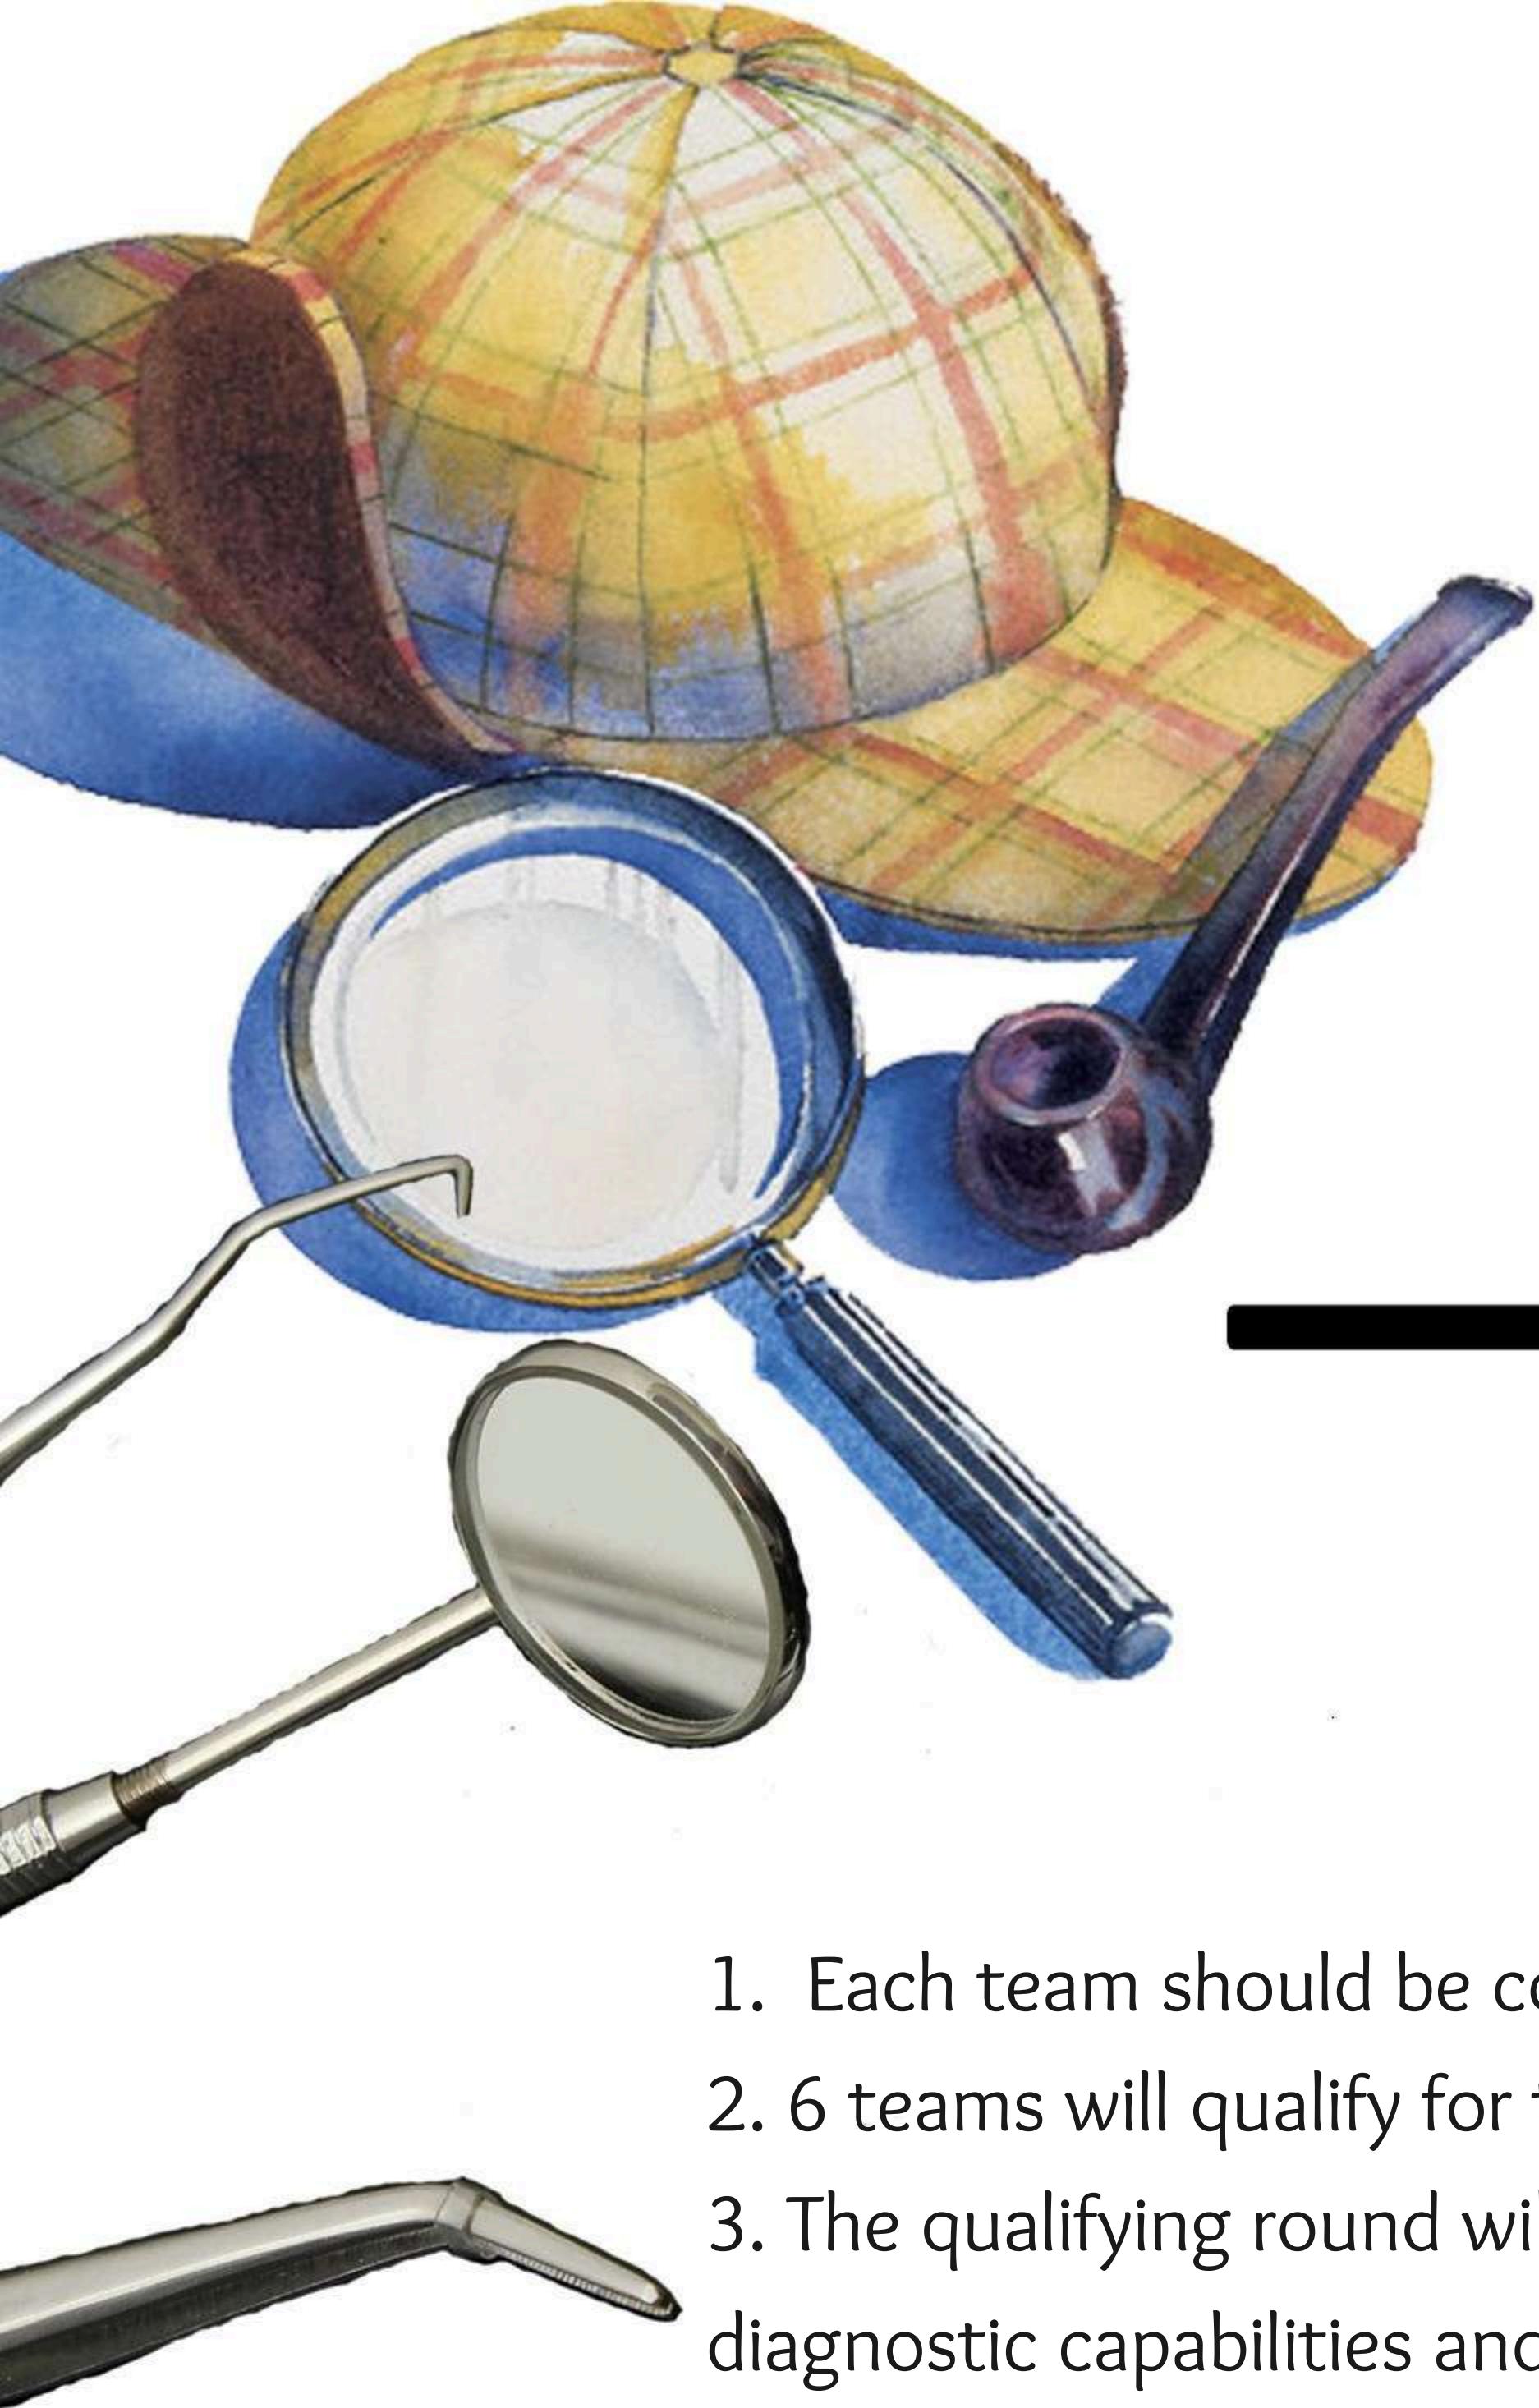

Questions in the written round will focus on clinical decision-making.

The participants will not be allowed to use mobile or other electronic gadgets.
